-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Acknowledgement of Receipt

Applicant's Response, filed 7/22/2010, in reply to the Office Action mailed 4/15/2010, is acknowledged and has been entered. Claims 1, 3 and 4 have been amended. Claims 1, 3, 4, 6-11, 13 and 14 are pending and are examined herein on the merits for patentability.

Response to Arguments

Applicant's arguments filed 7/22/2010 have been fully considered. The previous grounds for rejection have been withdrawn as being overcome by amendment. The double patenting rejections have been withdrawn in view of the terminal disclaimer filed 7/22/2010 over the claims of US 6,667,330.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3, 4, 7, 10, 11, 13 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims recite the compound "Di-[2-(4-Hydroxy-5-oxo-2-carboxylic acid methyl ester)]-disulfide". However, the identity of the claimed compound is unclear. It is noted that the instant specification

Art Unit: 1618

at published paragraph 0254 indicates that compounds of Formula I were named using the AUTONOM naming package within ChemOffice. However, upon using the stated program, the examiner was unable to generate a corresponding structure to the claimed compound. It is further noted that the name of the compound does not include a furan ring consistent with compounds of formula I or III, which may be the result of a typographical error. Clarification is requested.

Claims 1, 6, 8 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are drawn to a method of treatment for a mammal suffering from a dermatologic condition selected from contact dermatitis, acne, roseacea, and psoriasis, comprising administering a therapeutically effective amount of a compound of Formula 1. Attention is respectfully directed to MPEP 2173.05(h), which states that "when materials recited in a claim are so related as to constitute a proper Markush group, they may be recited in the conventional manner, or alternatively. For example, if "wherein R is a material selected from the group consisting of A, B, C and D" is a proper limitation, then "wherein R is A, B, C or D" shall also be considered proper." In the instant case, the dermatologic conditions are not listed in the conventional manner, such as to recite "a dermatologic condition selected from the group consisting of contact dermatitis, acne, roseacea, and psoriasis."

Art Unit: 1618

Claims 3, 7, 10 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are drawn to a method of treatment for a mammal suffering from a dermatologic condition selected dermatitis, acne, roseacea, and psoriasis, comprising administering a compound selected from those listed in the claim. Attention is respectfully directed to MPEP 2173.05(h), which states that "when materials recited in a claim are so related as to constitute a proper Markush group, they may be recited in the conventional manner, or alternatively. For example, if "wherein R is a material selected from the group consisting of A, B, C and D" is a proper limitation, then "wherein R is A, B, C or D" shall also be considered proper." In the instant case, the dermatologic conditions are not listed in the conventional manner, such as to recite "a dermatologic condition selected from the group consisting of contact dermatitis, acne, roseacea, and psoriasis."

Claims 9, 10 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are drawn to the method of claim 1 (or 3, or 4 respectively), additionally comprising an additional benefit agent, selected from sunscreens, etc. Attention is respectfully directed to MPEP 2173.05(h), which states that "when materials recited in a claim are so related as to constitute a proper Markush group, they may be recited in the conventional manner, or alternatively. For example, if "wherein R is a material selected from the group consisting of A, B, C and

D" is a proper limitation, then "wherein R is A, B, C or D" shall also be considered proper." In the instant case, the additional benefit agents are not listed in the conventional manner.
